Description: In the past half century, while some countries have achieved unprecedented rates of economic growth, other countries have experienced set-backs. For those that have seen rapid growth, economic changes have not always translated into improvements in human well-being and in some cases, rapid social changes have occurred in the absence of economic growth. In this context, the main objective of this course is to develop and deepen student interest in development issues and draw students' attention to the diversity of theories and perspectives within growth and development literature.

Suggested Textbooks:

We will be using some chapters of the following textbooks:

CD: James M. Cypher and James L. Dietz (2009), *The Process of Economic Development*, 3rd Edition, Routledge.

PH: Richard Peet and Elaine Hartwick (2009), *Theories of Development: Contentions, Arguments, Alternatives*, 2nd Edition, The Guilford Press.

Requirements: Students are expected to attend classes. Please do the required readings before coming to class. This will help you to follow the lecture and participate in class discussions.

Assessment:

- Midterm (35%)
- Attendance, participation and 5 response papers (30%)
- Term paper and its presentation in the class on one of the issues in Part III **OR** Final examination (35%): Depending on the number of students enrolled, **either** all students **or** only those who did well in the midterm will prepare and present a term-paper.

Response papers: Every other week, you are expected to submit a response paper addressing all or a subset of readings up to that point. The objective is to write a concise, well-crafted **question and answer** that will test not only the knowledge but also the ability to analyze and synthesize the readings and the lectures within that part. Your paper should not be longer than 500 words.

Presentations: There will be **strict** deadlines as follows: paper abstract: 72 hours before the presentation, presentation slides: 48 hours before the presentation, meeting with me (if necessary): 24 hours before the presentation. There will be groups of 3-4 depending on the number of students enrolled. Random group assignments are possible.

Make-up Exam Policy: If you miss the midterm exam for any reason, you must **PERSONALLY** bring a ***written statement of details of your excuse*** for missing the midterm to **my office** within **1 week** of the exam. Documentation brought in later will NOT be accepted. I reserve the right to refuse to give a make-up exam.

ACADEMIC HONESTY

Honesty and trust are important to us all as individuals. Students and faculty adhere to the following principles of academic honesty at Boğaziçi University

1. **Individual accountability** for all individual work, written or oral. Copying from others or providing answers or information, written or oral, to others is cheating.
2. Providing **proper acknowledgment of the original author**. Copying from another student's paper or from another text without acknowledgment is plagiarism.
3. Study or project group activity is effective and **authorized teamwork**. Unauthorized help from another person or having someone else to write one's paper or assignment is collusion.

Cheating, ***plagiarism*** and collusion are serious offences resulting in an F grade and disciplinary action.
